Limont

Limont

Montelukast 10mg + Levocetirizine 5mg

Tablets

WITH BEST ADVANTAGE OF BILAYER FORM

- ▣ Each tablet of MONTEFINE-L is Fully Automated with German technology which ensures MONTEFINE-L to be absorbed in the specific labile due to its bilayered technology.
- ▣ Montelukast sodium is alkaline stable and levocetirizine is acidic stable, when it comes in contact, it makes unstable during the shelf life of the formulation.
- ▣ Hence, bilayered tablet of MONTIFINE-L improves and increases the stability of both the drug in combination.

Levocetirizine 5 mg

Montelukast 10 mg
