# Novorac-Q10

Dehydroepiandrosterone & Reduced Coenzyme Q10 Tablets

Treatment of Patients with Ovarian Reserve (DOR) is one of the biggest challenges in assisted reproductive therapeutics

**Dehydroepiandrosterone (DHEA)** is Orally Consumed it is quickly absorbed into the blood stream through the intestines and binds to a sulfate compound which creates DHEA

**DHEA** supplements claim to help with a range of conditions, including sexual dysfunction, lupus, depression, adrenal insufficiency, cervical cancer, vaginal atrophy, and weight loss

**Co-enzyme Q10** is an anti-oxidant which protects the body from damage caused by free radicals

**Combined DHEA & CO Q10 supplementation significantly increases AFC as compared to DHEA alone which leads to a higher ovarian responsiveness**

# Novorac-Q10

## A Strong Formula For Fertility

<sup>Rx</sup> Iron Sucrose Injection USP

**Macrose**  
Injection

FOR IV USE ONLY

1 Ampoule of 5 ml,  
100 mg/5 ml.
