Ferrous ascorbate tab + Folic acid + Zinc

Tablets

## Ferrous Ascorbate

Ferrous Ascorbate is used to treat iron deficiencies in the body. Thus, it acts as a health supplement for those with low iron content in their diet. Iron increases the production of red blood cells and haemoglobin. Vitamin C present in Ferrous Ascorbate aids in the effective and maximum absorption of dietary iron.

## Folic Acid

High levels of homocysteine in the blood (hyperhomocysteinemia). This condition has been linked to heart disease and stroke. Taking folic acid by mouth lowers homocysteine levels in people with normal or high homocysteine levels and in people with kidney failure.

## Zinc Sulphate

Zinc is a naturally occurring mineral. Zinc is important for growth and for the development and health of body tissues. Zinc sulfate is used to treat and to prevent zinc deficiency.

### INDICATION IN:

- Iron Deficiency Anaemia
- Pregnancy Lactation
- Pernicious Anaemia
- Menorrhagia Spina Bifida
- Premenstrual Syndrome
