

In Allergic Rhinitis

Breathe Easy

RC-CET-10

Levocetirizine 10 mg *Tablet*

Levocetirizine

- Orally Active, potent, selective & long acting antihistaminic without any sedative effects

Controls both: early & late phase rhinitis

Synergistic effects: better than levocetirizine alone

Once daily dosage: improves patient compliance

• INDICATION •

- Allergic respiratory disease
- Perennial & seasonal allergic rhinitis
- Prophylaxis & treatment of chronic asthma
- Chronic idiopathic urticaria
