TENDOCAN

Chondroitin Sulfate 200 mg + Collagen peptide Type 1 40 mg+ **Tablets**
Vitamin C 35 mg + Sodium Hyaluronate 30 mg

Chondroitin Sulphate:

- Reduces pain & inflammation
- Improves joint function & elasticity in cartilage
- Slows progression of osteoarthritis

Collagen Peptidase Type I:

- Helps to rebuild joint cartilage and stop its degeneration
- Improves tendon & joint flexibility & strength
- Smoother joint & ligament mobility

Sodium Hyaluronate

- Acts like a shock absorber by lubricating tissues
- Reduces inflammation and pain

VITAMIN C

- Maintains collagen, which is essential for healthy joints, gums & skin
- Helps synthesize new collagen fibres Type-1 in an affected tendon
- The healing is faster with Vitamin C
